SPECIAL NOTICE

This publication is a statistical reference for agricultural exports and imports of the most recent 2 years. In addition, historical series are presented for the major commodities and commodity groups. Data are selected when current or previous year **totals** meet certain percentage criteria. Items in some tables may not add to **totals** because of rounding.

U.S. foreign agricultural trade statistics in this report are official U.S. data based on compilations of the Bureau of the Census. Agricultural commodities consist of (1) nonmarine food products and (2) other products of agriculture which have not passed through complex processes of manufacture, such as raw hides and skins, fats and oils, and wine. Such manufactured products as textiles, leather, boots and shoes, cigarettes, naval stores, forestry products, and distilled alcoholic beverages are not considered agricultural.

The trade statistics exclude shipments between the 50 States and Puerto Rico, between the 50 States and the island possessions, between Puerto Rico and the island possessions, among the island possessions, and in-transit through the United States from one foreign country to another when documented as such by U.S. Customs.

Exports

The export statistics also exclude shipments to the U.S. armed forces and diplomatic missions abroad for their own use and supplies for vessels and planes engaged in foreign trade. Data on shipments valued at less than \$251 are not compiled by commodity and are excluded from agricultural statistics, but are reflected in nonagricultural and overall export totals in this report. The agricultural export statistics include shipments under P.L. 83-480 (Agricultural Trade Development and Assistance Act), and related laws; under P.L. 87-195 (Act for International Development); and involving Government payments to exporters. USDA payments are excluded from the export value. Separate statistics on Government program exports are compiled by USDA from data obtained from operating agencies.

The export value, the value at the port of exportation, is based on the selling price (or cost if not sold) and includes inland freight, insurance, and other charges to the port. The country of destination is the country of ultimate destination, or where the commodities are to be consumed, further processed, or manufactured. When the shipper does not know the ultimate destination, the shipments are credited to the last country, as known to him at the time of shipment from the United States, to which the commodities are to be shipped in their present form. Except for Canada, export shipments valued at \$251-\$499 are included on the basis of sampling estimates; shipments to Canada valued at \$251-\$1,999 are sampled.

"Agricultural exports under specified Government programs" (table 7) include exports under programs authorized by Public Law 480, as amended. "Agricultural exports outside specified Government programs" (sales for dollars) include, in addition to unassisted commercial transactions, shipments of some commodities with governmental assistance in the form of (1) barter transactions involving overseas procurement for U.S. agencies, which benefit the U.S. balance of payments and rely primarily on authority other than P.L. 480; (2) extension of credit and credit guarantees for relatively short periods; (3) sales of Government-owned commodities at less than domestic market prices; and (4) export payments in cash.

Apparent excesses of exports under specified Government programs over total exports, which result in negative values in the column "Agricultural exports outside specified Government programs," may be due to lags in reporting, differences in valuation procedures, or the recording of the export as destined for the country through which transshipment was made.

Donations through the United Nations Relief and Works Agency (UNRWA) for the relief of Palestine refugees, United Nations Children's Fund (UNICEF), and United Nations Relief Organization of Dacca (UNROD), are not reported by country of destination. They are shown in the item "Country of destination not reported" in the column "Agricultural exports under Specified Government programs."

For certain commodities, referred to as Special Category commodities, security restrictions prevent the release of country of destination information.

Because of transshipments, the value of U.S. exports by country (tables 6 and 7) is overstated to Canada, the Netherlands, and Belgium and understated to West Germany, France, the United Kingdom, Switzerland, Ireland, Italy, Denmark, Sweden, Norway, Spain, Portugal, Japan, the People's Republic of China, Algeria, Brazil, and other countries.

Transshipments (tables 25, 26, 27, and 28) show movements of U.S. agricultural products through Canada, the Netherlands, and Belgium by commodity. In general, shipments are overstated to the three principal transit countries because final destination is not known at the time of export. Transit statistics from the three countries indicate final destinations by commodity. Tonnage and value should be deducted from exports to the three countries listed in tables 6 through 12, and added to the countries designated.

For known transshipments through Canada, a separate country code was established effective January 1, 1973. Table 25 indicates final destinations for transshipments through Canada during 1972. To adjust U.S. exports to Canada for 1972, deduct the amounts shown in table 26. Final destinations for transshipments through Canada ("Destination Unknown") during 1973 are listed in table 26. Transshipments should not be deducted from exports to Canada in 1973.

Commodity-by-country data (table 8) are printed at the 7-digit Schedule B commodity code level. Statistics on commodities valued under \$1 million are not shown, but are available for reference from Agricultural Specialist machine tabulations in the Statistics Program Area, Foreign Demand and Competition Division, Economic Research Service, U.S. Department of Agriculture. So-called "basket" classifications (28 commodities) were excluded because they consist of diverse items and do not provide for analytical clarity. Commodity codes listed under country data include the 1971 old Schedule B codes which became obsolete, effective January 1972 and the new Schedule B codes which replace them. Countries listed under commodity headings were based on a percentage of commodity export values as follows: (1) Commodities having an export value from \$1 million to \$5 million show countries accounting for 5 percent or more; (2) Commodities with export value from \$5 to \$20 million show countries accounting for 2 percent or more; (3) Commodities with export value of \$20 to \$50 million show countries accounting for 1 percent or more; and (4) Commodities valued over \$50 million show countries for 0.3 percent or more. The value of commodities from selected countries was subtracted from each commodity total to derive "other countries."

Country-by-commodity data (table 9) cover countries having agricultural export trade totals of \$1 million or more. The value of commodities exported to each country was summed and listed for the country at a 5-digit Schedule B level if the commodity total was 0.5 percent or more of the agricultural exports to that country, with the following exceptions: Commodities to Canada, United Kingdom, the Netherlands, France, West Germany, and Japan were listed if they accounted for 0.1 percent or more, and commodities exported to Mexico, Belgium and Luxembourg, Italy, and the Philippines were listed if they accounted for 0.2 percent or more. The 5-digit Schedule B codes as reported by the Bureau of the Census may include both agricultural and nonagricultural products. The 5-digit codes designated by an asterisk (*) in this report exclude the nonagricultural commodities. Value of selected commodities was subtracted from each country total to derive the "other agricultural products."

In commodity group-by-country data (table 11), 7-digit Schedule B commodity codes were summed to group totals. Each of the countries listed under each group accounted for 0.3 percent or more of the commodity group's export value with the following exceptions: Wheat, rice, feed grains, grains and preparations, corn, wheat and wheat products, grain sorghums, wheat and wheat flour, feed grains and products, and nonfat dry milk were listed if they accounted for 0.1 percent or more.

Imports

Imports for consumption are a combination of entries for immediate consumption and withdrawals from warehouses for consumption. Data on shipments valued at less than \$251 are estimated on the basis of a 1-percent sample and are not compiled by commodity. They are excluded from agricultural statistics but are reflected in nonagricultural and overall import totals in this report.

The import value, defined generally as the market value in the foreign country, excludes import duties, ocean freight, and marine insurance. The country of origin is defined as the country where the commodities were grown or processed. When the country of origin is not known, the imports are credited to the country of shipment.

Imports similar to agricultural commodities produced commercially in the United States and others that are interchangeable in use to any significant extent with such U.S. commodities are supplementary or partly competitive. All other commodities are complementary or noncompetitive.

Further explanatory material on foreign trade statistics and compilation procedures of the Bureau of the Census is contained in the publications of that agency.

Commodity-by-country data (table 20) are printed at the 7-digit Schedule A commodity code level. The 7-digit Schedule A codes as reported by the U.S. Bureau of the Census may include both agricultural and nonagricultural products. The 7-digit codes designated by an asterisk (*) in this report exclude the nonagricultural commodities. Basket classifications (31 commodities) were excluded. Countries listed under commodity headings were based on a percent of commodity import values as follows: (1) Commodities having an import value from \$1 million to \$5 million show countries accounting for 5 percent or more; (2) Commodities with import value from \$5 to \$20 million show countries accounting for 2 percent or more; (3) Commodities with import value of \$20 to \$50 million show countries accounting for 1 percent or more; and (4) Commodities valued over \$50 million show countries for 0.3 percent or more. The value of commodities from selected countries was subtracted from each commodity total to derive "other countries."

Country-by-commodity data (table 21) cover countries accounting for import totals of \$1 million or more. The value of commodities imported from each country was summed and listed for the country of origin at a 5-digit Schedule A level if the commodity total was 0.3 percent or more of the agricultural imports from that country, with the following exceptions: Commodities from Canada, Mexico, Brazil, Argentina, and Australia are listed if they account for 0.1 percent or more. The 5-digit Schedule A codes as reported by the Bureau of the Census may include both agricultural and nonagricultural commodities. The 5-digit codes designated by an asterisk (*) in this report exclude the nonagricultural commodities. Value of selected commodities was subtracted from each country total to derive the "other agricultural products."

In commodity group-by-country data (table 23), 7-digit TSUSA commodity codes were summed to group totals. Countries listed under each group accounted for 0.3 percent or more of the commodity group's import value with the following exception: Bananas and plantains, green coffee, cocoa beans, crude rubber, pork, and raw sugar were listed if they accounted for 0.1 percent or more.

XX Changes in country classifications.

Beginning Jan. 1, 1973

Destination Unknown: Transshipments through Canada where final destination is not known.

1/ Negative values in the commercial column, indicating an excess of Government program exports over total exports, may be attributed to lags in reporting or to differences in classification procedures.

T See note on transshipments on page iv.
